Objective

Recent B.Tech graduate in Information Technology with strong foundational knowledge in web technologies and backend systems. Skilled in troubleshooting, test planning, and resolving software issues. Seeking to apply my problem-solving skills and technical background in an **Application Support Engineer** role. Eager to contribute to software maintenance, testing, and cross-functional collaboration in a fast-paced IT environment.

Projects

Dynamic Food Ordering Website

- **Developed a full-stack food ordering web app using Django and MySQL.**
- **Built responsive UI with HTML, CSS, Bootstrap, and JavaScript.**
- **Implemented features like login, menu display, cart, and order tracking.**
- **Resolved integration issues and tested key flows across user journeys.**

Personal Blog Website Using Django

- **Created a blog site with secure user authentication and full CRUD functionality.**
- **Used Django ORM for database management and testing of user actions.**
- **Logged and debugged issues during development cycles to ensure reliability.**
- **Implemented basic test plans to verify login, blog creation, and access control.**
